

Incident Prefill

Using Incident Prefill in PL Rating gives your agency the competitive advantage of knowing driving history without the expense of running an MVR at the beginning of the sales process. Incident Prefill helps provide more accurate quotes, saving your agency time and money while fostering client relationships.

Features you need

- **Efficient & effective:** Avoid MVR chargebacks from carriers by using a capability that auto-populates driving history, helping you avoid timely data requests and passing additional costs along to your customers.
- **Reduce costs:** Incident Prefill seamlessly integrates with the PL Rating workflow saving agents time and money by reducing data entry and MVR chargebacks.
- **Build trust:** Eliminate the need to ask for sensitive information over the phone and provide a seamless experience for the client. Make it easier than ever to guide customer conversation and validate customer driving activity before submitting to a carrier, ensuring accurate rates at the point of sale.

Some customers have seen the potential for reducing quote time by 50%.

Incident Prefill auto-populates driving history, improving accuracy without having to charge a price to the consumer after getting MVR data from a carrier.

The Incident Prefill feature is available in the following states:

AZ, CT, FL, IA, IN, ID, MD, MN, MO, ND, NV, NJ, OH, OK, PA, SC*, SD, TN, TX, UT, VA, WA, and WI

*Indicates an activity indicator state
