

Sircon for States

Regulate and Protect

Sircon for States provides a central database to manage regulatory compliance for the insurance industry. Our solution has the flexibility to apply your state's unique requirements while making it easier for the industry to stay compliant.

The features you need

Effortless processing

Sircon provides state departments of insurance with an automated and efficient way to manage, process, and track critical regulatory information.

Tailored to match your needs

Every state is different, and departments of insurance are no exception. Sircon for States combines several modules to build a solution to fit your state:

- Producer licensing
- Education
- Company admissions
- Consumer complaints
- Enforcement cases
- Regulatory examination
- Revenue tracking
- Rate and form filings
- Taxes and assessment

All modules have built-in flexibility to support your rules, requirements, and capabilities.

Experience you can trust

Insurance regulation is critical to consumer protection. Over the last 25 years, Sircon has been dedicated to connecting state regulators and the insurance industry. Our robust solutions and targeted expertise have made us the trusted InsurTech provider for 20 states and counting.
